1. Claims 11 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 appears to be misdescriptive since the two fixing pins cannot be positioned in the first and third slots. The pins are positionable only in the first and second slots or in the second and third slots.

In claim 15, lines 3-4 are misdescriptive since the inner socket is not always protruded outwardly from the end of the outer socket. The first end of the inner socket is interior of the outer socket as shown in figure 3.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Neel, Haynes, Triplett et al, or Mathers.

4. Claims 2-10, 12-14, and 16-17 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 11 and 15 may be given favorable consideration if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
